MEET OUR TEAM!

The New Atel WB550-NA 5G router with CAT19 speeds, now available!
Go to Page 2 for more information.

Router Buyback Program Now Available!

Receive up to \$100 for your used equipment!

Terms and Conditions apply. Contact your DTS Technology representative for more information. Offer valid through 9/30/2023.

Check Out Our New Website!

Go to www.dtstechnology.com for all the newest deals, online ordering, instant support tickets, a Partner Portal, and more!

Introducing Fixed Wireless Access 2.0 - A Transformational Experience!

All offers available through 9/30/2023 or while supplies last.
Available for all Verizon segments including Public Sector, and available on all Verizon Business Internet plans.

A Device as a Service Program

A myriad of benefits, with NO downsides

- Access to high-end equipment at no extra cost
- Future proof – 4G LTE to 5G in-place upgrade
- Eliminates the risk of costs for replacement
- Advanced device exchange
- Ruggedization and mobile options for 4G
- No additional cloud management fees
- No early return penalties

You do you – we cover the rest!

Key Features

You can now maximize your 4G LTE as well as your 5G opportunities

Clients can get high-end equipment that's both 4G LTE and 5G ready with no extra cost!

Seamless DTS Technology Support engaging customers through multiple touchpoints!

Includes: Professional installation offered at time of fulfillment, 5-day technical follow-up with each device, and a topographical survey map with recommendations for optimal device placement based on location and elevation.

Advanced Exchange

DTS Technology fully manages all router maintenance, replacement, repairs, and support directly with the client.

No Early Return Penalties

Clients can return their device any time without penalties.

Ruggedization, plus Mobile Options available for 4G

Ruggedization kit from Ruggedology provides a convenient carrying handle as well as an included battery pack allowing up to 8 additional hours of battery.

Know Before You Go:

Second Line Activation Credit

This device can be sold to clients utilizing 4G. While under Fixed Wireless Access 2.0 service, should the client choose to upgrade to a 5G plan the Verizon representative will receive a line activation credit when the client switches.

Get two activations within one sale!

Meet the Atel WB550-NA 5G – The Ultimate Solution for Fixed Wireless Access 2.0

Yes, even for LTE data plans!

All offers available through 9/30/2023 or while supplies last. Available for all Verizon segments including Public Sector.

The Atel WB550-NA paired with Fixed Wireless Access 2.0 is a game-changer in every sense! With a sleek, ergonomic design and lightning-fast speeds this device is expected to redefine how we experience the landscape of LTE and 5G.

FREE ON ALL QUALIFYING VERIZON BUSINESS INTERNET PLANS!

Why It Makes Sense:

It's FREE on qualifying Verizon Business Internet Plans

Purchase a qualifying Verizon Business Internet Plan of 10Mbps or higher or a qualifying 5G Business Internet plan and DTS Technology will provide the device to the client free of charge!

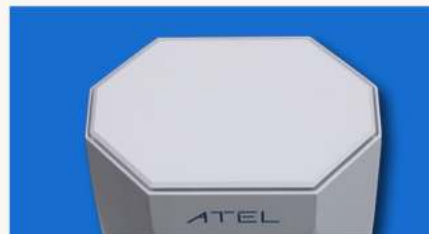

Part of the Fixed Wireless Access 2.0 Initiative

The WB550 is the first device to hit the market as part of Fixed Wireless Access 2.0. Clients will get all repairs and support services completely free of charge and directly from DTS Technology.

4G LTE AND 5G capable!

We're here to meet you where you're at. No matter what kind of access is available at your location, the Atel WB550-NA has you covered. Stream, browse, and work effortlessly with a 4G LTE connection or a 5G connection.

Plus, check out our Ruggedization Kits for the WB550NA!

Know Before You Go:

Using the WB550-NA with Fixed Wireless Access 2.0

The client support process has been completely streamlined and will be entirely handled by DTS Technology. Verizon representatives will not need to act as an intermediary to submit tickets or follow up on returns. Post-sale the client will be handed to DTS Technology for all support issues, replacements, or returns. Clients can still reach out to Verizon representatives to upgrade or activate a new line should they choose to do so (representatives will get an additional line activation credit in this case).

Know Before You Go:

- DTS Technology and OuterFactor have partnered to bring high-quality drop-tested products that your clients can customize with their own logo and branding.
- Target Industries include field service, transportation, healthcare, education, energy/oil/gas, first responders, and waste management.
- Encourage clients to use our custom logo program to brand their tablets and phones with their company name and logo to prevent customers from assuming that employees are not paying attention when using these devices. This helps your clients avoid the risk of customers perceiving device use as a lack of attention towards them.

All PotsLinQ solutions require activation of a qualifying Verizon Business Internet plan.

Know Before You Go:

- All PotsLinQ solutions through DTS Technology requires activation on a qualifying Verizon Wireless data plan. All prices above are not inclusive of the required Verizon plan.
- All POTS lines must be replaced eventually. This is a great solution to bring in front of any client that still has POTS lines.

A-La-Carte Support Services from DTS Technology

All offers available through 9/30/2023 or while supplies last. Available for all Verizon segments including Public Sector.

Advanced Device Exchange & Equipment Protection Plan - \$7.99/month

In the case of a **faulty device provided by DTS Technology** we will reimburse or exchange your device. Provides additional insurance against accidental events such as drops and spills.

Managed Router Service (Remote Support) - \$49.95/month

Service includes Safe Category Filters via DNS, Firewall protections, remote support and troubleshooting, plus advanced replacement.

Standard On-Site Router Installation - \$399

We will provide a technician visit at your business location to facilitate deployment of a new LTE device. Service includes basic set up and training on how to use testing. Does not include any re-creation of existing topography, structural cabling services, or additional device set up.

Advanced On-Site Router Installation - \$899

We will provide a technician visit at your business location to set up, configure, and train on new router installation. Includes re-creation of existing topography, troubleshooting and adjustments to the network operation of existing services. We will work with your IT to establish connectivity and verify topography.
